ABOUT ME

My name is Thomas Stefano Patti, born on 26 December 2005. I attended the I.T. school. Archimede in the IT branch.

Thanks to the school I attended and my passion for IT, I have strong digital competence, with experience in using a variety of digital tools and platforms. I can effectively browse the web, manage social media, use productivity software, and understand basic principles of programming and web development.

I am an adaptable and resilient person, always ready to learn and adapt to new situations. I am also a critical thinker, able to analyze information from different perspectives and make logical, informed judgments.

I am excited to bring my skills and experience to your team and am confident that I can significantly contribute to the success of your organization.

WORK EXPERIENCE

Catania, Italy

Apprentice TLT Ascensori s.a.s. di Roberto Patti Cristian

During my apprenticeship period in TLT Ascensori s.a.s. by Roberto Patti Cristian, I had the opportunity to acquire general technical and practical skills in the sector.

My first period of work was an introduction to the world of elevators. I learned the basic principles of elevator operation and got an overview of the various types of elevators that the company installs and maintains.

In the following periods, I started working closely with an experienced technician. He taught me how to install various elevator components, such as the doors, floor buttons, and cable system. I also learned to read and interpret technical drawings.

As I gained more skills, I was given more responsibility. I began to actively participate in elevator installations, working both in teams and individually.

An important part of my apprenticeship was elevator maintenance. I have learned to perform regular checks to ensure that elevators are working properly and safely. This included checking that the doors were functioning properly, inspecting the cables and lubricating the moving parts.

During my apprenticeship, I also had the opportunity to interact with customers. I learned to communicate effectively and manage customer expectations. This helped me develop my interpersonal skills and understand the importance of customer service in this industry.

Overall, my apprenticeship in the company was a very educational experience. I have acquired a general base of technical skills and developed a solid understanding of the elevator industry.
